No cooling off rights apply to investments in the Units.

Potential Investors should note that the Issuer retains discretion to amend the closing date for the offer for a Series and move the Commencement Date (and all other consequential dates) for a Series, or not to continue with the issue of a Series of Units on the Commencement Date and terminate any Units in that Series already issued, including where there is a significant change in the Issuer’s cost of hedging between the date of this Term Sheet PDS and the Commencement Date. In particular, the Issuer will not continue with the issue of a Series of Units if it considers that it and its affiliates have not completed sufficient arrangements for management of their respective obligations in respect of that Series of Units. If a decision is made not to issue a Series of Units or to terminate Units in a Series that have already been issued, the Issuer will return the Prepaid Interest, and any applicable Fees that have been paid upfront to applicants without interest within 10 Business Days of the scheduled Commencement Date.

1. Overview

The Units in Sequoia Launch Series 38 (“the Units”) offer investors the ability to gain leveraged exposure to a basket of two US listed exchange traded funds (“Reference Basket”) with a 15% Target Volatility mechanism, with each fund providing access to a diversified portfolio of underlying companies operating in the rapidly evolving robotics, automation and artificial intelligence sectors. The Units offer the potential to receive an uncapped Performance Coupon at Maturity at the end of year 3 dependent on the performance of the Strategy Value.

The Reference Basket will consist of an equi-weighted basket of the following 2 leading US exchanged traded funds (“ETFs”) operating in the robotics, automation and/or artificial intelligence sectors:

- ROBO Global® Robotics and Automation Index ETF
- The Global X Robotics & Artificial Intelligence ETF

These ETFs seek to invest in companies that potentially stand to benefit from increased adoption and utilization of robotics and artificial intelligence, including those involved with industrial robotics and automation, non-industrial robots, and autonomous vehicles. The Units have the ability to pay an uncapped Performance Coupon at maturity based on the full leveraged investment amount less a 10% Performance Fee.

A summary of the key features are as follows

Launch Series 38		
	Weighting	Fund
Reference Basket: Equally weighted exposure to the following 2 US listed ETFs:	50%	ROBO Global® Robotics and Automation Index ETF (Nasdaq Ticker: ROBO)

A decrease in the AUD/USD exchange rate will increase the amount of a Performance Coupon (if any) payable in Australian dollars. An increase in the AUD/USD exchange rate will reduce the amount of the Final Coupon (if any) payable in Australian dollars.

Further Information

Currency Exposure	USD	
Final Value	\$1.00 per Unit on the Maturity Date. The returns on the Units will be made up of the Final Value per Unit and any Performance Coupon payable during the Investment Term (if any) based on the performance of the Strategy Value and any changes in the AUD/USD exchange rate between the Commencement Date and Maturity Date, as reduced by the 10% Performance Fee.	
Potential uncapped Performance Coupon at Maturity	Potential for an uncapped Performance Coupon at Maturity calculated by reference to the performance of the Strategy Value and any changes in the AUD/USD exchange rate between the Commencement Date and Maturity Date, as reduced by the 10% Performance Fee. The Performance Coupon is the Final Coupon for the purposes of the Master PDS. Refer to Section 3: "Worked Examples" and "Section 4: Formulae and Calculations" for Performance Coupon formulae.	
Strategy	Unhedged exposure to the Reference Basket, including reinvestment of net distributions, with a 15% Target Volatility. Any distributions from the underlying ETFs included within the Reference Basket are reinvested, net of any withholding tax.	
Initial Strategy Value	The average of the Strategy Values on the Initial Averaging Dates.	
Final Strategy Value	The average of the Strategy Values on the Final Averaging Dates.	
Strategy Value	The Strategy Value is dependent on the Units' varying levels of exposure to the relevant Reference Basket. This varying level of exposure is determined by the Participation Rate, which is calculated by reference to the Target Volatility, and the volatility of the Reference Basket over the previous 10 or 50 Basket Business Days. The Strategy Value is used to determine the value of the Performance Coupon, if any. The Strategy Value is calculated each Basket Business Day by: <ul style="list-style-type: none"> • taking the change in the level of the relevant Reference Basket from the close of the previous Basket Business Day to the close of the current Basket Business Day, • multiplying it by the Participation Rate (which determines the exposure to the relevant Reference Basket) from the previous Basket Business Day, • taking the USD Libor 3 month rate from the previous Basket Business Day and converting this to a daily interest rate, • multiplying this new interest rate by: (100% minus the Participation Rate), • taking the sum of these two amounts, and • multiplying this amount by the Strategy Value from the previous Basket Business Day. The effect of this is that as the volatility of the Reference Basket increases above the level of the Target Volatility, exposure to the Reference Basket decreases and exposure to the USD Libor 3 month rate increases, and vice versa. In this way the Strategy Value will vary from one Basket Business Day to the next depending on the change in the level of the Reference Basket and the Participation Rate. The Issuer intends to publish the Strategy Value (on a monthly basis) on its website at www.sequoiasi.com.au .	Section 4 Formulae and Calculations

Participation Rate and Target Volatility

Volatility is the relative rate at which the price of an asset may move (increasing or decreasing), over a period of time. If an asset's relative price changes quickly (either positively or negatively) over a period of time, it will be considered to have high volatility. If an asset's relative price changes are not quick, it will be considered to have low volatility. A high level of volatility is considered to be an indication that an asset may have greater risk.

The Participation Rate is a mechanism designed to manage market risk associated with the performance of the Reference Basket. It operates by varying the exposure that the Units will have to the Reference Basket depending on the volatility of the Reference Basket and the Target Volatility. The higher the volatility, the lower the Participation Rate (and hence the lower the exposure to the Reference Basket) and vice versa.

Target Volatility is the level of volatility that would provide a Participation Rate of 100%. The Units have a maximum Participation Rate of 100%. Accordingly, Investors will not receive enhanced exposure to the Reference Basket even at times of low volatility.

The Participation Rate is determined on each Basket Business Day by reference to the highest volatility of the Reference Basket over the previous 10 or 50 Basket Business Days. The Participation Rates will vary between 0% and 100%.

The Participation Rate for each Series is determined using the formula set out below.

Please refer to Section 4 "Formulae and Calculations" for more information.

**Section 4
Formulae and
Calculations**

Target Volatility

15%

Participation Rate

The Participation Rate will be calculated by reference to the Target Volatility and the level of Realised Volatility of the Reference Basket using the following formula:

$$PR_t = \text{Min} (100\%, \text{Target Volatility}/\text{Realised Volatility}_{t-1})$$

$$\text{Target Volatility} = 15\%$$

$$\text{Realised Volatility} = \text{Max} (\text{Vol}_{10,t}, \text{Vol}_{50,t})$$

$\text{Vol}_{10,t}$ = volatility of the Reference Basket over the previous 10 Basket Business Days.

$\text{Vol}_{50,t}$ = volatility of the Reference Basket over the previous 50 Basket Business Days.

Based on this, the Participation Rate (PR_t) would have been 61.45% based on a Realised Volatility level of 24.41% on 23 March 2018, a few weeks before the date of this PDS. This is calculated as:

$$PR_t = \text{Min} (100\%, 15\%/24.41\%)$$

$$PR_t = 61.4\%$$

There is a risk that the Participation Rate for any Series could drop to significantly below 100% during the Investment Term. A Participation Rate of below 100% means that Investors have less than 100% exposure to the Reference Basket.

Investors should note that historical volatility levels of the Reference Basket are not indicative of the future levels of volatility. Specifically, Investors should note that there may be a risk that the level of volatility will be high throughout the majority or whole of the Investment Term. Should this occur, the Participation Rate may result in less than 100% exposure to the Reference Basket throughout the majority or whole of the Investment Term. The minimum Participation Rate is just above 0% which means that Investors have would have almost no exposure to the Reference Basket.

Please refer to Section 4 "Formulae and Calculations" for the Realised Volatility formula.

**Section 4
Formulae and
Calculations**

Loan

100% limited recourse Loan.

**Master PDS
-Section 7
"Loan"**

Loan Amount

\$1.00 per Unit

**Interest Rate & Prepaid Interest**

The interest rate in respect of the Loan is 5.95% p.a.

The Prepaid Interest is paid upfront for the full 3 year Investment Term.

Prepaid Interest per Unit = 5.95% p.a. x 3 years x \$1.00 per Unit
= \$0.1785 per Unit for the Investment Term of 3 years.

The Prepaid Interest must be paid to the Issuer by the Application Payment Date.

Therefore, if you invested the Minimum Investment Amount of \$50,000 for the Units, in addition to any Fees paid in relation to the Units, you would pay Prepaid Interest of \$8,925 on the Application Payment Date.

Issue Price	\$1.00 per Unit
Listing	The Units will not be listed or displayed on any securities exchange.
Currency	Australian dollars
Minimum Investment Amount	\$50,000 per Series at the Issue Price of \$1.00 per Unit.
Withdrawal of the Units	If the Issuer is unable to achieve the economic exposure described in this PDS on the Commencement Date due to any condition set out in this PDS not being satisfied (e.g. the Issuer being unable to hedge its obligations), or otherwise determines not to proceed with the issue for any reason, then the Issuer will terminate any Units already issued, and return the Prepaid Interest and Fees without interest. The Loan will be terminated and no drawdown will be made.
Lead Distributor	Sequoia Asset Management Pty Ltd (ACN 135 907 550, AFSL 341506)

Minimum Buy-Back Amount	10,000 Units per Series providing Investors continue to hold at least 10,000 Units in the relevant Series. In the event that an Investor makes an Issuer Buy-Back Request which would result in the Investor holding less than 10,000 Units in a particular Series, then the Issuer will notify the Investor that it will hold less than 10,000 Units and seek the Investor's instruction whether to buy back the Investor's entire holding in that Series or reject the request.
Minimum Early Maturity Value, Termination Payment and Buy-Back Price	<p>\$1.00</p> <p>If the Units mature early for any reason, you will receive an Early Maturity Value of \$1.00 which will be applied to your Loan. You will not have to pay any other fees, costs or interest.</p> <p>Investors will not be entitled to a refund of any Prepaid Interest or any other Fees paid in relation to the Units and will not be entitled to any Final Coupon or payment of the Final Value (as the Final Value of \$1.00 will be used to pay off your Loan).</p> <p>Please refer to Section 1.10 "Early Maturity" of the Master PDS for more information on when the Units can mature early.</p>

Agency Sale Option	Available. Please refer to Clause 4.4 of Section 6 "Terms of the Deferred Purchase Agreement" in the Master PDS.

Key Risks

Key risks include:

- Your return (including any Coupon) is affected by the performance of the Underlyings comprising the Reference Basket and the AUD/USD exchange rate. There is no guarantee that the Reference Basket or the AUD/USD exchange rate will perform well.
- In the Event that an appropriate hedge cannot be achieved in relation to all or some of the Underlying's comprising the Reference Basket, the Issuer may choose to remove the Underlying or replace the Underlying with a similar fund in its absolute discretion. Any changes will be notified on the Issuers website and in correspondence to Investors.
- The Units have varying levels of exposure to the Reference Basket depending on volatility due to the variable Participation Rate. It operates by varying the exposure that the Units will have to the Reference Basket depending on the Realised Volatility of the Reference Basket and the Target Volatility. There is the risk that the Participation Rate could drop below 100% during the Investment Term in which case Investors will not gain the full benefits of an increase of the value of the Reference Basket.
- Investors should note that there is a lag in measuring the Realised Volatility of the Reference Basket. This means that where there has been a period of high Realised Volatility, the Investor's exposure to the Reference Basket will be low, regardless of whether the Reference Basket is performing positively or negatively.
- There will be no Performance Coupon payable if the performance of the Strategy Value is negative at a Coupon Determination Date.
- There is no guarantee that the Units will generate returns in excess of the Prepaid Interest, Risk Management Fee and other Fees, during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back, Early Maturity Event, you will not receive a refund of your Prepaid Interest or Fees.
- Gains (and losses) may be magnified by the use of a 100% Loan. However, note that the Loan is a limited recourse Loan, so you can never lose more than your Prepaid Interest Amount and Fees paid at Commencement.
- Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty; and
- the Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.

Please refer to Section 2 "Risks" of the Master PDS for more information.

Risk Management Fee

There is a Risk Management Fee of 0.7% p.a. of the Issue Price paid upfront for the full 3 year Investment Term.

The Risk Management Fee is a fee charged for managing the volatility (a measure of risk) of the Reference Basket. The Issuer aims to ensure that the volatility of the Reference Basket is equal to or less than the level of the Target Volatility, however, there is no guarantee that this level of volatility will be achievable throughout the Investment Term.

Risk Management Fee per Unit = 0.7% p.a. x 3 years x \$1.00 per Unit
= \$0.021 per Unit for the Investment Term of 3 years. The Risk Management Fee must be paid to the Issuer by the Application Payment Date.

Therefore, if you invested the Minimum Investment Amount of \$50,000 for the Units, in addition to any Interest and other Fees paid in relation to the Units, you would pay a Risk Management Fee of \$1,050 on the Application Payment Date.

Performance Fee

Any Performance Coupons are subject to a 10% Performance Fee. The Performance Fee has the effect of reducing the gross amount of any Coupon payable to the Investor. For example, if a 5% Performance Coupon is payable, then the net amount payable to the investor would be 4.5% after the deduction of the Performance Fee. The impact of changes to the AUD/USD exchange rate are applied to the net Performance Coupon after deducting the Performance Fee. If the Performance Coupon is 0%, then no Performance Fee is payable.

Other Fees

The following other Fees are payable in respect of the Units (in addition to the Performance Fee, which is discussed below):

Upfront Adviser Fee (if any): You may nominate an Upfront Adviser Fee to be paid to your Adviser in the Application Form attached to this Term Sheet PDS. The Issuer will deduct any Upfront Adviser Fee from the Total Payment Amount and pay it to your Adviser in accordance with the terms of this PDS.

Application Fee: The Issuer charges an Application Fee of 2.2% of the Issue Price of each Unit, i.e. \$0.022 per Unit. The Issuer may agree with your Adviser to forgo part or all of the Application Fee at the Issuer’s absolute discretion.

Assuming you nominated an Upfront Adviser Fee of \$550, and you applied for 100,000 Units in Series 38, in addition to the Prepaid Interest you would pay other Fees of:

Application Fee	= 100,000 x \$0.022	= \$2,200
Upfront Adviser Fee		= \$550
	Total	= \$2,750

Derivatives

The Issuer obtains exposure to the Strategy through the use of derivatives rather than a direct investment in the Strategy, Reference Basket or securities comprising the Reference Basket.

Taxation

Please refer to Section 4 “Taxation” of the Master PDS.

Applications and issue of Units

Applications may be accepted or rejected at the discretion of the Issuer. Units will be issued within one month upon receipt of application monies from an Investor. The Unit’s economic exposure to the Reference Basket will begin on the Commencement Date. If a Unit is issued prior to the Commencement Date it will have no economic exposure until the Commencement Date.

The Sequoia Launch Series 38 Units will only be issued at the discretion of the Issuer, and applications may be accepted or rejected at the discretion of the Issuer. Without limiting its discretion, the Issuer may choose not to proceed with the issue of the Units for a Series and terminate the product for those Units already issued for any reason whatsoever, including (without limitation) if there is a significant change in the Issuer’s cost of hedging between the date of this PDS and the Commencement Date. Where the Issuer has not received the Prepaid Interest, Risk Management Fee, Application Fee or Upfront Adviser Fee (if any) in respect of a Unit(s) from the Investor by the Application Payment Date, the Issuer will cancel the Units relating to the unpaid amounts and will arrange for the Investors name to be removed from the register of Unitholders.

If a decision is made for any reason not to issue, or not to proceed with the issue of the Units in Series 38, the Issuer will return the Prepaid Interest, Risk management Fee, Application Fee and Upfront Adviser Fee (if any) to applicants (without interest) within 10 Business Days of the scheduled Commencement Date and any Units already issued will be terminated.

The Units may mature early in the case of an Early Maturity Event or Issuer Buy-Back, and the Maturity Date may be extended in the case of a Market Disruption Event.

3. Worked Examples

Here are some examples demonstrating how the Performance Coupon is calculated. The examples are hypothetical only and are not forecasts or simulations of Unit returns nor are they a reference to past performance. The actual returns on the Units may be materially different from what is shown in these examples.

These examples may help Investors decide if the Units are a suitable investment. No content in this section or elsewhere in the Term Sheet PDS or PDS is investment advice and Investors should speak to their financial adviser before investing.

3.1 How does the investment perform?

Units may entitle Investors to receive a Performance Coupon at Maturity depending on the performance of the Strategy Value. The examples below demonstrate how the Performance Coupon is calculated depending on whether the performance of the Strategy Value over the life of the investment has been negative, positive or neutral.

The examples set out below show the return on an investment in the Units at Maturity.

Rounding:

All calculations made by the Issuer for the purposes of these worked examples will be made to not fewer than two decimal places. Other than as provided in these examples, rounding of numbers will not occur until the final calculation of a relevant amount or number at which time the Investor's entitlements will be aggregated and that aggregate will be rounded so that all money amounts are rounded down to the nearest whole cent and all numbers of Delivery Assets are rounded down to the nearest whole number.

Assumptions:

The below examples assume that Investors decide to invest in 100,000 Units with a \$1.00 Issue Price, resulting in an Investment Amount and Loan Amount of \$100,000 in Series 38.

The below examples also assume that there are no Early Maturity Events, Issuer Buy-Backs, Adjustment Events or Market Disruption Events.

Calculation of the Performance Coupon at Maturity

There is one potential Performance Coupon payable to Investors at Maturity. It is calculated with reference to the Initial Strategy Value and the Final Strategy Value.

The Units will pay out any positive performance at Maturity. The Performance Coupon is determined by calculating the gross performance since the Commencement Date (determined by reference to the Initial Strategy Value and Final Strategy Value) and then reducing this amount on account of the Performance Fee and adjusting for changes in the AUD/USD exchange rate during the Investment Term.

The following examples show how the net value (that is, the value as reduced by the impact of any relevant Performance Fee and AUD/USD exchange rate) of the Performance Coupon would be calculated, based on the assumed Strategy Values set out for Scenario 1 in the table below for a hypothetical investment in Series 38 of 100,000 Units at an Issue Price of \$1.00 per Unit.

Date	Strategy Value			AUD/USD exchange rate
	Scenario 1 Positive Performance	Scenario 2 Negative Performance	Scenario 3 Moderate Performance	
Initial Strategy Value:	100	100	100	0.77
Final Strategy Value	150	50	125	0.65

Calculate the value of the Performance Coupon at Maturity

For Scenario 1, the Net Performance Coupon per Unit would be calculated as follows at the Coupon Determination Date:

$$\begin{aligned} \text{Gross Performance Coupon (USD)} &= \text{Max}(0, \text{Final Strategy Value}/\text{Initial Strategy Value} - 1) \\ &= \text{Max}(0, 150/100 - 1) \\ &= \text{Max}(0, 50\%) \\ &= 50\% \end{aligned}$$

$$\begin{aligned} \text{Net Performance Coupon (AUD)} &= \text{Gross Performance Coupon} \times 90\% \times (\text{Series Spot Rate}_{y0}/\text{Series Spot Rate}_{y1}) \\ &= 50\% \times 90\% \times 0.77/0.65 \\ &= \$0.5330 \text{ AUD per Unit} \end{aligned}$$

(The 90% shown in the above formula has the effect of reducing the Performance Coupon by the 10% Performance Fee).

Based on a holding of 100,000 Units and an Issue Price of \$1 per Unit, the Gross Performance Coupon paid would be 50% or \$50,000 USD. Upon conversion to AUD, and after taking into account the impact of Performance Fees, the total amount of the Performance Coupon payable to an Investor in cash would be \$53,300 AUD.

Overview of Scenarios 1, 2 and 3

The table below sets out the Performance Coupon per Unit which would apply to Scenario 1, 2 and 3. Each of the values listed below for Scenario 2 & 3 were calculated in the same way as set out in the example above for Scenario 1.

	Scenario 1	Scenario 2	Scenario 3
Gross Performance Coupon per Unit	\$0.50	\$0.25	\$0.00
Net Performance Coupon per Unit	\$0.5330	\$0.2665	\$0.00

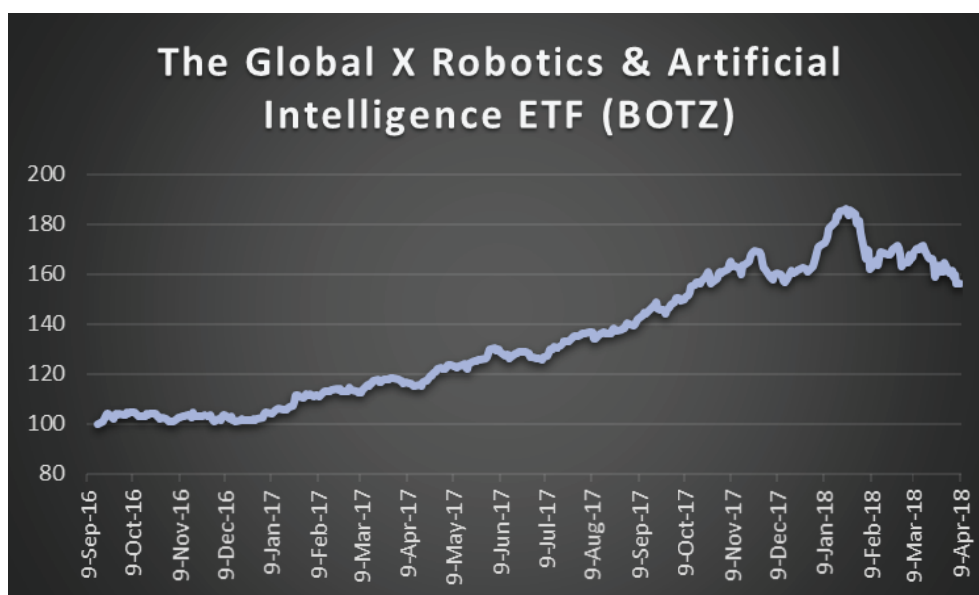

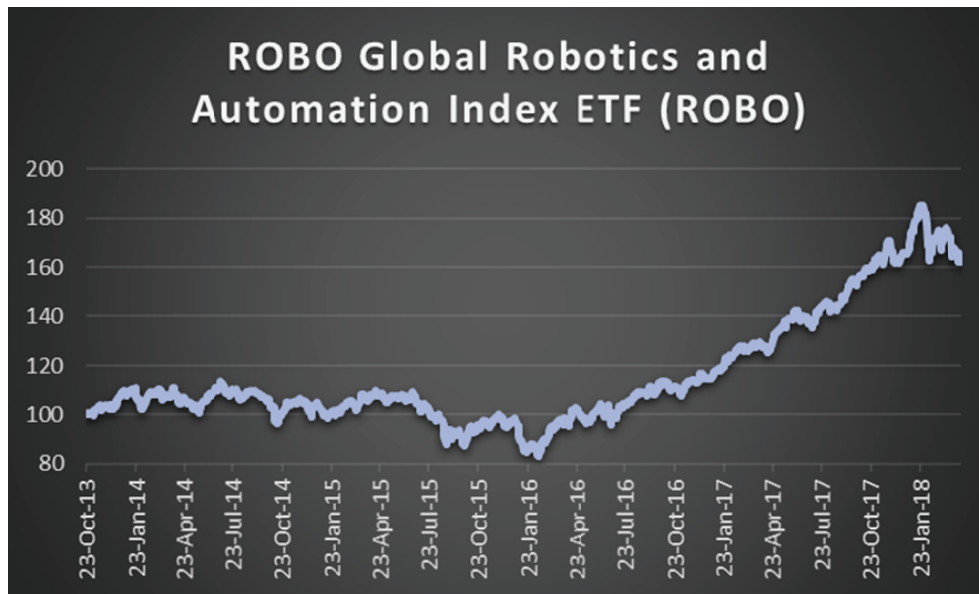

4. Historical Performance of Underlying Funds comprising the Reference Basket

Historical information for each of the Underlying's comprising the Reference Basket have been provided by the Issuer to potential investors for educational purposes only and is not indicative of the future performance of the Units. It is important to note that the returns on the Units are based not only on the return of each Underlying but also on the volatility of each Underlying, as well as the 3 month USD Libor rate . The data represents either the previous 5 years' performance data or, where this is not possible due to an Underlying existing for less than 5 years, all published performance data.

Investors should note that past performance is not a reliable indicator of future performance. Future volatility and returns may vary.

5. Formulae and Calculations

Strategy Value, Reference Basket and Participation Rate

The Strategy Value ("SV") is the value of the Strategy providing exposure to the Reference Basket with a variable exposure (through a variable Participation Rate) depending on the Realised Volatility of the Reference Basket and a Target Volatility of 15%. The Strategy Value will start at 100 on the Commencement Date and the Initial Strategy Value will be set to the average of the Strategy Value on the Commencement Date and the following 9 Business Days.

$$\text{Strategy Value}_0 = \text{Reference Basket}_0 = 100\%$$

$$\begin{aligned} \text{Strategy Value}_t = & \text{Strategy Value}_{t-1} \times \left[1 + \text{PR}_{t-1} \times \left(\frac{\text{Reference Basket}_t}{\text{Reference Basket}_{t-1}} - 1 \right) \right] \\ & + (1 - \text{PR}_{t-1}) \times \text{rate}_{t-1} \times \frac{\text{Act}_{t-1,t}}{360} \times \left(1 - \text{AF} \times \frac{\text{Act}_{t-1,t}}{360} \right) \end{aligned}$$

$$\text{Reference Basket}_t = \text{Reference Basket}_{t-1} \times \left(\sum_{i=1}^{i=2} 50\% \times \frac{\text{Underlying Price}_{i,t} + \text{Div}_{i,t}}{\text{Underlying Price}_{i,t-1}} \right)$$

Where:

Reference Basket_t means the value of the Reference Basket on the Scheduled Trading Day t

Reference Basket_{t-1} means the value of the Reference Basket on the business day before Scheduled Trading Day t

The value of the Reference Basket on the Commencement Date is 100

Underlying Price_{i,t} means, in respect of Underlying i, the Closing Price of such Underlying as of the Scheduled Trading Day t

Div_(i,t) means any cash dividends received by the Hedge Provider on Scheduled Trading Day t in respect to the hedge position held in Underlying i under this Transaction, net of any relevant local tax withholding, applicable charges, taxes, costs and expenses.

rate_t is the 3-Month USD LIBOR rate, fixed at 11am London time, or thereabouts, two (2) London Business Days prior to the start of each Interest Period, according to Reuters Page "LIBOR01", as determined by the Issuer. If such rate does not appear on Reuters Page "LIBOR01", the rate for the relevant day will be determined by the Issuer in good faith and in a commercially reasonable manner.

AF = 1% p.a.

Act_(t-1,t) is the number of calendar days from and excluding the Scheduled Trading Day t-1, to and including the Scheduled Trading Day t

PR_t is the Participation Rate as of Scheduled Trading Day t and is capped at 100%, as determined as follows

$$\text{PR}_t = \frac{\text{Target Volatility}}{\max(\text{vol}_{10,t}; \text{vol}_{50,t})}$$

$$\text{Vol}_{n,t} = \sqrt{\frac{252}{n} \times \sum_{k=t-n+1}^{k=t} R_k^2}$$

$$R_k = \ln \left(\frac{\text{Reference Basket}_k}{\text{Reference Basket}_{k-1}} \right)$$

vol_{10,t} means the realized volatility of the Reference Basket over the previous 10 Scheduled Trading days

vol_{50,t} means the realized volatility of the Reference Basket over the previous 50 Scheduled Trading days

vol_{n,t} means the realized volatility of the Reference Basket over the previous number ("n") of Scheduled Trading days ("t")

Reference Basket_k means the value of the Reference Basket on the Scheduled Trading Day k

Reference Basket_{k-1} means the value of the Reference Basket on the business day before Scheduled Trading Day k

Target Volatility is set to 15%

Scheduled Trading Day means a day on which all the Underlyings are available for trading on the Relevant Exchange.

Performance Coupon

Gross Performance Coupon (USD) = Max (0, Final Strategy Value/Initial Strategy Value – 1))

Net Performance Coupon (AUD) = Gross Performance Coupon x 90% x
(Series Spot Rate_{y0}/Series Spot Rate_{y1})

Where:

Initial Strategy Value The average of the Strategy Values on the Initial Averaging Dates

Final Strategy Value The average of the Strategy Values on the Final Averaging Dates

Series Spot Rate_{y0} means the relevant AUD/USD spot rate at Commencement Date

Series Spot Rate_{y1} means the relevant AUD/USD spot rate at Maturity

(The 90% shown in the above formulas has the effect of reducing the Gross Coupon by the 10% Performance Fee).
