No cooling off rights apply to investments in the Units.

**Potential Investors should note that the Issuer retains discretion to amend the closing date for the offer for a Series and move the Commencement Date (and all other consequential dates) for a Series, or not to continue with the issue of a Series of Units on the Commencement Date and terminate any Units in that Series already issued, including where there is a significant change in the Issuer’s cost of hedging between the date of this Term Sheet PDS and the Commencement Date. In particular, the Issuer will not continue with the issue of a Series of Units if it considers that it and its affiliates have not completed sufficient arrangements for management of their respective obligations in respect of that Series of Units. If a decision is made not to issue a Series of Units or to terminate Units in a Series that have already been issued, the Issuer will return the Prepaid Interest, and any applicable Fees that have been paid upfront to applicants without interest within 10 Business Days of the scheduled Commencement Date.**

# 1. Overview

The Units in Dispersion – Global Energy Transformation – Series 8 offer investors the ability to gain exposure to the Dispersion of a Reference Basket of listed US Shares (each an “Underlying”) during the period from the Commencement Date to the Maturity Date (being a period of approximately 18 months) based on the full leveraged Investment Amount. Investment in the Units is by way of a 100% LVR limited recourse loan, with Investors only being required to pay an Application Fee and Prepaid Interest following a successful application for Units.

The Reference Basket consists of US listed Shares which have been characterised by the Issuer as:

- Green Energy Stocks being companies playing a key role in improving clean energy efficiency. This includes companies involved in the renewable energy generation/distribution sectors such as a solar panels producer (ENPH), diesel and natural gas engines manufacturer (CMI), industrial atmospheric and specialty gases producer (APD), clean electricity distributor (NEE) and semiconductors (AMD);
- Traditional Energy Stocks being companies playing a key role in the Oil & Gas market as producers, refiners and transporters.

The Units provide investors with a potential uncapped Performance Coupon at Maturity based on the full leveraged investment amount depending on the performance of Dispersion of the Reference Basket during the Investment Term provided the realised level of Dispersion at Maturity is greater than the Hurdle. The Performance Coupon is also adjusted for changes in the AUD/USD exchange rate during the Investment Term.

## Summary of the key features are as follows

Dispersion	The dispersion of a basket of securities is typically measured by how much the return of each individual security in the basket differs, in absolute terms from the average return of the overall basket over a given period of time. Each of these return differentials are averaged and the greater the average, the higher the measure of dispersion  Refer to the Formulae & Calculations section of the PDS for a precise formula for calculating Dispersion.			
Potential Performance Coupon	Yes, the potential for one uncapped Performance Coupon based on the realised level of Dispersion at Maturity LESS the Hurdle, as adjusted for changes in the AUD/USD exchange rates			
Hurdle*	The Hurdle is determined by the Issuer on the Commencement Date. As at the date of the PDS the Hurdle would be 35%. The Issuer will not proceed with the issue of Units if the Hurdle cannot be set at or below 35% on the Commencement Date			
Currency Exposure	Yes, the potential Performance Coupon at Maturity is adjusted for changes in the AUD/USD exchange rate during the Investment Term			
Limited recourse Loan	Yes			
Investment Term	18 months			
Annual Interest Rate on Loan (payable for the full 18 months in advance)	4.3% p.a. (6.45% payable upfront for the full 18 month Investment Term)			
Application Fee	1.1% including GST			
Total Investment cost for the full 18 month period	7.55%			
Break-Even Level Dispersion at Maturity excluding FX	42.55%			
Margin Calls	No			
SMSF Eligibility	Yes			

# 2. What is Dispersion

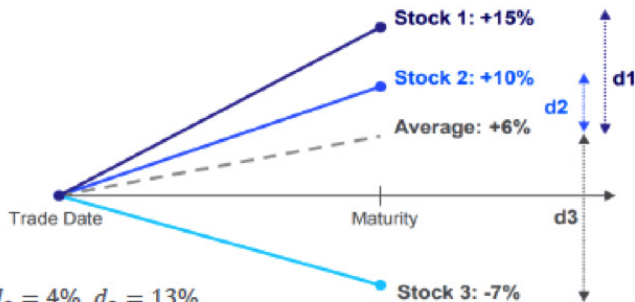

The dispersion of a basket of securities is measured by how much the return of each individual security in the basket differs, in absolute terms from the average return of the overall basket over a given period of time. Each of these return differentials are averaged and the greater the average, the higher the measure of dispersion.

The charts below illustrate the difference between low dispersion of returns and high dispersion of returns. Please note the first chart is entitled Chart 2 and there is no Chart 1.

## How to Calculate Dispersion

On a basket of three stocks, the dispersion of the basket in the example below is 8.7%

$$d_1 = 9\%, d_2 = 4\%, d_3 = 13\%$$

$$d = (d_1 + d_2 + d_3) / 3 = 8.7\%$$

- $d_1$  = dispersion of individual Stock 1
- $d_2$  = dispersion of individual Stock 2
- $d_3$  = dispersion of individual Stock 3
- $d$  = dispersion of the basket of 3 stocks

It is important to note that when calculating the individual stock dispersion, this measure only looks at the absolute difference in performance as compared to the average performance. Whether or not it is negative or positive difference makes no difference to the calculation.

## When does Dispersion Generate Positive Returns?

The Dispersion is calculated on the relative performance of the constituents of the basket versus the performance of the basket as a whole. The greater the difference in the relative performance of each constituent as compared to the average performance the greater the potential for returns. However, it is important to note the performance of each constituent is also relevant to the calculation of the average performance of the basket. This interdependence means that a positive dispersion will depend on the individual circumstances and returns may vary significantly even where general market conditions are very similar.

For example in a rising market if all constituents in the basket move in line with each other, then the dispersion will be low and there is unlikely to be a positive return. If, however, the rising market is caused by one or two constituents significantly outperforming the rest of the basket there is likely to be an increase in dispersion returns. Alternatively in a flat or falling market if all the constituents are contributing equally to the performance of the basket there is unlikely to be any significant dispersion to generate a return. If, however, two constituents outperform significantly and two constituents underperform significantly whilst the average of the basket is unchanged, there is likely to be an increase in dispersion returns.

An increase in the AUD/USD exchange rate between the Commencement Date and the Maturity Date will reduce the Performance Coupon whilst a decrease in the AUD/USD rate between the relevant dates will lead to an increase in the Performance Coupon.</li><li>• There is no guarantee that the Units will generate returns in excess of the Prepaid Interest and Fees, during the Investment Term. Additionally, in the event of an Investor requested Issuer Buy-Back or an Early Maturity Event you will not receive a refund of your Prepaid Interest or Fees.</li><li>• Gains (and losses) may be magnified by the use of a 100% Loan. However, note that the Loan is a limited recourse Loan, so you will never be required to pay more than the Prepaid Interest Amount and Fees at Commencement.</li><li>• Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty; and</li><li>• the Units may mature early following an Early Maturity Event, including an Adjustment Event, Market Disruption Event or if the Issuer accepts your request for an Issuer Buy-Back.</li></ul> <p>Please refer to Section 2 "Risks" of the Master PDS for more information.</p>

<b>Fees</b>	<p>The following Fees are payable in respect of the Units:</p> <p><b>Upfront Adviser Fee (if any):</b> You may nominate an Upfront Adviser Fee to be paid to your Adviser in the Application Form attached to this Term Sheet PDS. The Issuer may agree with your Adviser to forgo part or all of the Application Fee at the Issuer's absolute discretion.</p>
<b>Derivatives</b>	<p>The Issuer obtains exposure to the Reference Basket through the use of derivatives rather than a direct investment in the Reference Basket or securities comprising the Reference Basket.</p>
<b>Taxation</b>	<p>Please refer to Section 4 "Taxation" of the Master PDS.</p>

## Applications and issue of Units

Applications may be accepted or rejected at the discretion of the Issuer. Units will be issued within one month upon receipt of application monies from an Investor. The Unit's economic exposure to the Reference Basket will begin on the Commencement Date. If a Unit is issued prior to the Commencement Date it will have no economic exposure until the Commencement Date.

The Dispersion – Global Energy Transformation – Series 8 will only be issued at the discretion of the Issuer, and applications may be accepted or rejected at the discretion of the Issuer. Without limiting its discretion, the Issuer may choose not to proceed with the issue of the Units for a Series and terminate the product for those Units already issued for any reason whatsoever, including (without limitation) if there is a significant change in the Issuer's cost of hedging between the date of this PDS and the Commencement Date. Where the Issuer has not received the Prepaid Interest, Application Fee, or Upfront Adviser Fee (if any) in respect of a Unit(s) from the Investor by the Application Payment Date, the Issuer will cancel the Units relating to the unpaid amounts and will arrange for the Investors name to be removed from the register of Unitholders.

If a decision is made for any reason not to issue, or not to proceed with the issue of the Units in Series 8, the Issuer will return the Prepaid Interest, Application Fee, and Upfront Adviser Fee (if any) to applicants (without interest) within 10 Business Days of the scheduled Commencement Date and any Units already issued will be terminated.

The Units may mature early in the case of an Early Maturity Event or Issuer Buy-Back, and the Maturity Date may be extended in the case of a Market Disruption Event.

## 4. Worked Examples

Here are some examples demonstrating how the Performance Coupon is calculated. The examples are hypothetical only and are not forecasts or simulations of Unit returns nor are they a reference to past performance. The actual returns on the Units may be materially different from what is shown in these examples.

These examples may help Investors decide if the Units are a suitable investment. No content in this section or elsewhere in the Term Sheet PDS or PDS is investment advice and Investors should speak to their financial adviser before investing.

### 4.1 How does the investment perform?

Units may entitle Investors to receive a Performance Coupon at the end of the Investment Term depending on the performance of the Dispersion of the Reference Basket. The examples below demonstrate how the Performance Coupon is calculated, and what Investors will receive at Maturity, depending on whether the performance of the Dispersion over the life of the investment has been negative, positive or neutral after deducting the Hurdle.

The examples set out below show the return on an investment in the Units at Maturity.

#### Rounding:

All calculations made by the Issuer for the purposes of these worked examples will be made to not fewer than two decimal places. Other than as provided in these examples, rounding of numbers will not occur until the final calculation of a relevant amount or number at which time the Investor's entitlements will be aggregated and that aggregate will be rounded so that all money amounts are rounded down to the nearest whole cent and all numbers of Delivery Assets are rounded down to the nearest whole number.

#### Assumptions:

The below examples assume that Investors decide to invest in 100,000 Units with a AUD \$1.00 Issue Price, resulting in an Investment Amount and Loan Amount of AUD\$100,000 in Series 8.

The below examples also assume that there are no Early Maturity Events, Issuer Buy-Backs, Adjustment Events or Market Disruption Events.

#### Calculation of the Performance Coupon

There is one potential Performance Coupon, payable to Investors at the end of the Investment Term. This is calculated by reference to the Dispersion of the Reference Basket on the Coupon Determination Date.

The following examples show how the Performance Coupon would be calculated, based on the assumed Dispersion levels and AUD/USD exchange rate values set out for Scenario 1 in the table below for a hypothetical investment in Series 8 of 100,000 Units at an Issue Price of AUD\$1.00 per Unit. When calculating the Performance Coupon payable the Hurdle of 35% is deducted from the realised level of Dispersion at Maturity.

Date	Dispersion at Maturity			AUD/USD exchange rate (Series Spot rate)
	Scenario 1 Strong Performance	Scenario 2 Poor Performance	Scenario 3 Moderate Performance	
Commencement Date				0.76
Maturity Date	56.91%	32.67%	46.1%	0.65

## Calculation of Dispersion

For Scenario 1, the Dispersion was calculated on the Maturity Date on the basis of the following Closing Prices of each underlying included in the Reference Basket

Underlying (i)	Closing Price on Commencement Date	Closing Price on Maturity Date (j)	Absolute Performance of each Underlying <sup>1</sup>	Dispersion of Each Underlying <sup>3</sup>
Enphase Energy Inc	197.87	308.11	155.71%	5.55%
Cummins Inc	238.61	547.37	229.40%	79.24%
Air Products and Chemicals Inc	253.64	515.55	203.26%	53.10%
NextEra Energy Inc	83.40	201.45	241.55%	91.39%
Advanced Micro Devices Inc	91.47	138.55	151.47%	1.31%
Chevron Corp	91.48	59.4	64.93%	85.23%
Exxon Mobil Corp	52.1	22.01	42.25%	107.91%
ConocoPhillips	46.78	27.49	58.76%	91.39%
Honeywell International Inc	203.86	410.55	201.39%	51.23%
Marathon Petroleum Corp	49.48	75.64	152.87%	2.71%

### Average Reference Basket Performance

**150.16%<sup>2</sup>**

### Dispersion

**56.91%<sup>4</sup>**

<sup>1</sup> Absolute Performance of each Underlying = Closing Price on Maturity Date/Closing Price on Commencement Date

<sup>2</sup> Calculated as the average Performances of all underlying included the Reference Basket ("Average Reference Basket Performance")

<sup>3</sup> Dispersion of each individual underlying is calculated as the absolute Performance of each Underlying LESS Average Reference Basket Performance

<sup>4</sup> This is Dispersion as defined in this Term Sheet PDS and represents the average of the dispersion of each underlying included in the Reference Basket

## Calculate the value of the Performance Coupon

For Scenario 1, the Performance Coupon per Unit would be calculated as follows on the Maturity Date assuming a Hurdle of 35%:

$$\begin{aligned}
 \text{Performance Coupon} &= \text{Max} (0, \text{Dispersion} - \text{Hurdle}) \times (\text{Series Spot Rate}_{y_0} / \text{Series Spot Rate}_{y_{1.5}}) \\
 &= \text{Max} (0, 56.91\% - 35\%) \times (0.76/0.65) \\
 &= 25.62\% \\
 &= \$0.2562 \text{ AUD per Unit}
 \end{aligned}$$

Based on a holding of 100,000 Units, the Performance Coupon paid would be \$25,620 AUD.

Assuming a total cash outlay including interest and fees of \$7,550, the net cash profit generated by the investor after receiving the Performance Coupon of \$25,620 would be \$18,070:

Total Cash Outlay = (\$7,550)

Performance Coupon = \$25,620

Net Cash Profit = \$18,070

## Overview of Scenarios 1, 2 and 3

The table below sets out the Performance Coupon per Unit which would apply to Scenario 1, 2 and 3. Each of the values listed below for Scenario 2 & 3 were calculated in the same way as set out in the examples above for Scenario 1.

	Scenario 1	Scenario 2	Scenario 3
Total Cash Outlay on 100,000 units	\$7,550	\$7,550	\$7,550
Performance Coupon	\$25,620	\$0	\$12,980
Net Cash Profit/(Loss)	\$18,070	(\$7,550)	\$5,430
Investment return as a % of total cash outlay	239%	-100%	71.9%

## 5. Formulae and Calculations

### Dispersion

$$\text{Dispersion} = \frac{1}{10} \times \sum_{i=1}^{10} \left[ \frac{S_{T,i}}{S_{0,i}} - \text{Basket} \right]$$

$$\text{Basket} = \frac{1}{10} \times \sum_{i=1}^{10} \frac{S_{T,i}}{S_{0,i}}$$

$S_{T,i}$  = Closing price of Underlying i on Maturity Date

$S_{0,i}$  = Closing price of Underlying i on Commencement Date

Closing price = the closing price of Underlying i on the Relevant Exchange on the relevant date.

Underlying 1 to 10 = the ten shares comprising the Reference Basket

**Performance Coupon** =

Max (0, (Dispersion – Hurdle)) x (Series Spot Rate<sub>y<sub>0</sub></sub>/Series Spot Rate<sub>y<sub>1.5</sub></sub>)

Where:

**Series Spot Rate<sub>y<sub>0</sub></sub>** means the relevant AUD/USD spot rate at the Commencement Date

**Series Spot Rate<sub>y<sub>1.5</sub></sub>** means the relevant AUD/USD spot rate at the Maturity Date
